for Nebraska

# **CTE Course Codes & Clearing Endorsements**

**(Formerly called Appendix D)**

**2020-2021**

**Nebraska  
Department of  
Education**

**GENERAL INFORMATION**

Nebraska approval regulations (Rule 14) and accreditation regulations (Rule 10) require that certain percentages of F.T.E. (Full Time Equivalency) elementary and middle grade teachers hold appropriate endorsements and that certain percentages of instructional units at the secondary grades be assigned to teachers holding appropriate endorsements. For teachers to be considered appropriately endorsed for their assignments, they must teach the grade levels and subjects indicated on their certificate. The grade level designations are shown on the following chart.

Certificate/Endorsement Level

<b>LEVEL</b>	<b>Appropriate for the following grades</b>
00	PK
01	Pre Primary – 3 all schools
02	K-6

21	B-PK
22	5-9

*The following pages show courses or subjects taught in Nebraska schools and the appropriate endorsements for those subjects or courses. In instances where no specific endorsement is required, the “level” of endorsement must still be appropriate for the assignment.*

The following items describe special cases or circumstances.

**Middle Grades:**

- 1) A middle level endorsement can be applied to the endorsed subjects for which it is issued in grades 5-8 whether these grades are designated as part of an elementary, or a middle school.
- 2) A middle level endorsement clears any subject area and course code for grades 5-9 if issued prior to 8/1/2017. Middle level endorsements issued on, or after 8/1/2017 are specific to one, or more subject areas.
- 3) For grades seven and eight, a middle level endorsement or an appropriate secondary endorsement is appropriate in the subject area(s) listed, if proper college credits or training are provided (see Item #5 below).
- 4) Teachers holding an elementary endorsement may teach any subject in grades seven and eight if they acquire six credit hours per year towards a middle level endorsement or if they participate in staff development in accordance with a local mission or plan for education of middle grade students.
- 5) Teachers holding a content area endorsement at the secondary level may teach grade six in that content area if they acquire six credit hours per year toward the elementary or middle level endorsement or participate in staff development in accordance with a local mission and plan for education of middle grade students.
- 6) Regardless of whether 9<sup>th</sup> grade is identified as being part of a middle school or high school, an appropriate secondary endorsement or a middle level endorsement covers a ninth-grade teaching assignment in the specific subject area(s) for which the endorsement is issued.
- 7) Secondary teachers may be assigned to integrated courses or curriculum in grades seven through nine if they hold an endorsement for any of the subjects or fields included in the course.
- 8) Teachers not holding an appropriate endorsement may be assigned to the middle grades if they acquire six credit hours per year towards a middle level endorsement.

**Secondary Grades:**

- 9) In secondary grades, teacher's assigned to integrated courses or curriculum are considered appropriately endorsed if they hold an endorsement for any of the subjects or fields included in the course.
- 10) Course descriptions in this manual shown for grades 10, 11, and 12 are intended to describe higher level courses. If, however, the course is taught at a 9<sup>th</sup> grade level, the

<b>COURSE CODES AND CLEARING ENDORSEMENTS</b>	Revised <b>April 2020</b>
---	----------------------------------

appropriate middle level endorsement will cover the assignment. A middle level endorsement is appropriate in grade 9 at a high school, but only if there are no students above grade 9 enrolled in the course(s) being taught.

Elementary Grades:

- 11) Teachers holding an elementary endorsement that also includes grades 7-8 (K-8 in self-contained classrooms) are considered endorsed in grades 7-8 only if the students they are teaching remain with them for over 50% of their school day, and they are teaching over 50% of the academic curriculum to those same students.

**AGRICULTURE, FOOD AND NATURAL RESOURCES****INTRODUCTION TO AG, FOOD & NATURAL RESOURCES****Short Name  
AG/EN-INTR****Course Code  
011000**

The introductory course for the Agriculture, Food and Natural Resources Career Cluster providing a knowledge base and technical skills in all aspects of the industry. Learners will be exposed to a broad range of agriculture, food and natural resources careers, cluster foundation knowledge and skills, introduction to leadership development, the FFA organization and career exploration. Classroom and laboratory activities are supplemented through supervised agricultural experiences and leadership programs and activities.

Recommended Level: Grades 9-12

Career Cluster: Agriculture, Food, and Natural Resources

**ANIMAL SCIENCE****Short Name  
ANI SCI****Course Code  
011004**

A course focusing on the basic scientific principles and processes that are involved in animal physiology, breeding, nutrition, and care in preparation for an animal systems career. Topics include animal diseases, introduction to animal science, animal nutrition, animal science issues, career opportunities and animal evaluation. Classroom and laboratory activities are supplemented through supervised agricultural experiences and leadership programs and activities.

**LARGE ANIMAL MANAGEMENT****Short Name  
LG ANIMGMT****Course Code  
011005**

This course includes advanced scientific principles and communication skills that build on the knowledge and skills learned in Animal Science. Topics include animal waste management, animal science economics, decision making, global concerns in the industry, genetics, and breeding. Classroom and laboratory activities are supplemented through supervised agricultural experiences and leadership programs and activities.

Recommended Level: Grades 10-12

Career Cluster: Agriculture, Food, and Natural Resources

**CASE INTRODUCTION TO AGRICULTURE, FOOD & NATURAL RESOURCES**

<u>Short Name</u>	<u>Course Code</u>
<b>CASE AFNR</b>	<b>018060</b>

Students participating in the Introduction to Agriculture, Food, and Natural Resources course will experience exciting “hands-on” activities, projects, and problems. Student experiences will involve the study of communication, the science of agriculture, plants, animals, natural resources, and agricultural mechanics. While surveying the opportunities available in agriculture and natural resources, students will learn to solve problems, conduct research, analyze data, work in teams, and take responsibility for their work, actions, and learning. For example, students will work in groups to determine the efficiency and environmental impacts of fuel sources in a practical learning exercise.

**PROGRAMMING I**

Short Name

Course Code

**PROG I**

**270401**

Programming I covers fundamental concepts of programming. These are provided through explanations and effects of commands and hands-on utilization of computers to produce correct output. This course introduces effective techniques necessary for the efficient solution of a variety of complex problems using a high-level programming language. It includes problem descriptions, flow charts, hierarchy diagrams, pseudocode, and program documentation as a means of solving these problems. This course emphasizes the creation of efficient algorithms through fundamental programming techniques such as input/output handling, programming structures, and data storage. Students are introduced to project management techniques, including standard debugging techniques and collaborative programming strategies.

<b>PROJECT LEAD THE WAY - COMPUTER SCIENCE PRINCIPLES</b>	<u>Short Name</u> <b>PLTW-CSP</b>	<u>Course Code</u> <b>270708</b>
---	--------------------------------------	-------------------------------------

Using Python® as a primary tool and incorporating multiple platforms and languages for computation, this course aims to develop computational thinking, generate excitement about career paths that utilize computing, and introduce professional tools that foster creativity and collaboration. Computer Science Principles helps students develop programming expertise and explore the workings of the Internet. Projects and problems include app development, visualization of data, cybersecurity, and simulation. PLTW is recognized by the College Board as an endorsed provider of curriculum and professional development for AP® Computer Science Principles (AP CSP). This endorsement affirms that all components of PLTW CSP’s offerings are aligned to the AP Curriculum Framework standards and the AP CSP assessment.

<b>PROJECT LEAD THE WAY – COMPUTER SCIENCE ESSENTIALS</b>	<u>Short Name</u> <b>PLTW-CSE</b>	<u>Course Code</u> <b>270710</b>
---	--------------------------------------	-------------------------------------

In Computer Science Essentials, students will use visual, block-based programming and seamlessly transition to text-based programming with languages such as Python to create apps and develop websites, and learn how to make computers work together to put their design into practice. They'll apply computational thinking practices, build their vocabulary, and collaborate just as computing professionals do to create products that address topics and problems important to them. Computer Science Essentials helps students create a strong foundation to advance to Computer Science Principles, Computer Science A, and beyond.

**EXERCISE SCIENCE**

Short Name  
**EXER SCI**

Course Code  
**077601**

This course is appropriate for students wishing to pursue a career in personal training or for those who desire an introduction in the field of exercise science. The course will enable students to perform fitness assessments, according to current national guidelines and to use data to develop exercise and training routines, fitness plans and nutritional programs to fit the needs of clients. Successful completion of this course along with any other requirements may lead to a potential eligibility to take the Personal Trainer Exam through a certifying body. Leadership development activities of the career and technical student organization HOSA|Future Health Professionals is strongly encouraged. This course may be available for dual credit at a postsecondary institution. Classroom, laboratory and educational leadership activities are supplemented through Nebraska HOSA/Future Health Professionals, Career Student Organization.

Prerequisites for this course are Introduction to Health Sciences (077300) and Anatomy/Physiology (130210).

Recommended Level: Grades 11 -12

**HUMAN LIFE CYCLE NUTRITION**

Short Name

Course Code

**HULICY NUT**

**077702**

This course is designed to give students an understanding of human nutrition and how it plays a role in every human life cycle. Students will apply nutritional concepts to specific lifestyles requirements across the lifespan. Students will evaluate nutrition and wellness practices and suggest improvement plans based on current USDA recommendations and socioeconomic impacts on eating. In this course, students will assess career options and employment skills required to be in the food and nutrition industry.

Classroom and laboratory activities are supplemented through experiences and leadership programs and activities through Nebraska HOSA/Future Health Professionals and Nebraska FCCLA Career Student Organizations (CTSO's).

<b>PLTW PRINCIPLES OF BIOMEDICAL SCIENCE I</b>	<u>Short Name</u> <b>PLTW BMD I</b>	<u>Course Code</u> <b>077803</b>
--	--	-------------------------------------

This is the first of two courses. Students must complete this course in order to take Biomedical Science II. Due to the nature of PLTW project based course design this yearlong course is divided into two semesters for course coding and reporting. It is up to the teacher discretion where semester break occurs in individual classrooms.

In the introductory course of the PLTW Biomedical Science program, students explore concepts of biology and medicine to determine factors that led to the death of a fictional person. While investigating the case, students examine autopsy reports, investigate medical history, and explore medical treatments that might have prolonged the person's life. The activities and projects introduce students to human physiology, basic biology, medicine, and research processes while allowing them to design their own experiments to solve problems.

Teacher/Instructor is required to successfully complete PLTW teacher professional development in order to teach this course.

Principles of Engineering (POE) is a Project Lead The Way survey course of engineering. The course exposes students to some of the major concepts that they will encounter in a postsecondary engineering course of study. Students have the opportunity to investigate engineering and high tech career. POE gives students the opportunity to develop skills and understanding of course concepts through activity-, project-, and problem-based (APPB) learning.

Teacher/Instructor is required to complete PLTW teacher professional development in order to teach this course.

**PLTW DIGITAL ELECTRONICS**

Short Name

Course Code

**PLTW DIG**

**100403**

Digital Electronics (DE) is a Project Lead The Way course designed for the study of electronic circuits that are used to process and control digital signals. In contrast to analog electronics, where information is represented by a continuously varying voltage, digital signals are represented by two discrete voltages or logic levels. This distinction allows for greater signal speed and storage capabilities and has revolutionized the world of electronics. Digital electronics is the foundation of all modern electronic devices such as cellular phones, MP3 players, laptop computers, digital cameras, high definition televisions, etc. The major focus of the DE course is to expose students to the design process of combinational and sequential logic design, teamwork, communication methods, engineering standards, and technical documentation.

Teacher/Instructor is required to complete PLTW teacher professional development in order to teach this course.

<b>INTRODUCTION TO AVIATION AND AEROSPACE</b>	<u>Short Name</u> <b>INTROAV</b>	<u>Course Code</u> <b>101701</b>
---	-------------------------------------	-------------------------------------

The course engages students in an inquiry-based, problem-solving approach to investigate and understand the science of aeronautics and aerodynamics. The activities are designed to encourage teamwork and participation among the students. The course also provides a broad understanding of the three types of aviation: commercial, military, and general aviation.

<b>PLTW COMPUTER INTEGRATED MANUFACTURING</b>	<u>Short Name</u> <b>PLTW MFG</b>	<u>Course Code</u> <b>101901</b>
---	--------------------------------------	-------------------------------------

Computer Integrated Manufacturing (CIM) is a Project Lead The Way course designed to study manufacturing planning, integration and implementation of automation. The course explores manufacturing history. Individual processes, systems, and careers. In addition to technical concepts, the course incorporates finance, ethics, and engineering design. This reflects an integrated approach that leading manufacturers have adopted to improve safety, quality and efficiently.

Teacher/Instructor is required to complete PLTW teacher professional development in order to teach this course.
